

2018/2019 Bulk Sample

Existing U/G Development 200 m off-section

Area 51
Newly discovered mineralized corridor

Previously unknown Extension of the Jeremie Pluton

Fenelon Gold
Cross Section 0850
(120 m corridor)
Looking Northwest
April 23, 2019

Au g/t Core Length (m)	Current Release
Au g/t Core Length (m)	Previously Released
	Mineralized Drill Intersections (> 1 g/t Au)
	2019 Drill Holes*
VG	Visible Gold (where assays pending)
* Dashed portion of the drill hole traces are outside of the 120m section corridor	

	Gold Mineralized Zones
	Gabbro/Pyroxenite
	Porphyry intrusions
	Monzodiorite (Jeremie Pluton?)
	Volcanics
	Argillite/Graphitic Argillite
